March 19, 1981

Ellis Perl, Director
Department of Public Works
City of Waukegan
146 N. Utica Street
Waukegan, Illinois 60085

EPA Region 5 Records Ctr.

350934

Dear Mr. Perl:

A reinspection of your property located at the southwest corner of Yorkhouse and McAree Roads in Waukegan was made by Jeff Stofferahn and Dan Shane, representing this Agency on March 9, 1981.

James Ambroso of the Lake County Health Department was also in attendance during the inspection.

The inspection disclosed the following condition(s) which constitute violations of the Environmental Protection Act and Chapter 7 of the Illinois Pollution Control Board Solid Waste Rules and Regulations:

... Leachate was observed to be seeping from the south and east edges of the filled areas into the perimeter drainage ditches. You should take immediate action to correct this situation.

... Leachate was ponded on the south perimeter drainage ditch. You should take immediate action to correct this violation.

... Access to the site is not restricted. A gate, fencing or other measures should be provided to prevent access to the site from McAree Road.

As per your letter of December 16, 1980, I would be happy to meet with you, at your convenience, and discuss possible corrective action at this site.

Sincerely,

Kenneth P. Bechely, Northern Region Manager
Field Operations Section
Division of Land/Noise Pollution Control

FROM UAS

SUBJECT Lake COUNTY - DLPC Inspection

Waukegan / Muni #1

GENERAL REMARKS

Inspected site with Dan Lhuna of IEPA-DLPC and
Dan Ambrose of Lake County Health Department. The
northwest entrance to the site was open, where
numerous trucks were entering and depositing
clay, adding to a large stockpile already present

INTERVIEW

This clay was being worked into the large pile by a
cat. The randomly deposited refuse noted previously
near the center of the site has been removed. A large
leachate seep was again found at (A), and the leachate
was again ponded in the drainage ditch on the sites
south edge. Several large seeps were also found

DIAGRAM

at (B). Both seeps were sampled by Mr. Ambrose.

LPC-19

Mr. Ambrose stated he had heard the city might attempt to buy the a
portion of the properties along the south edge of the site, so a new
drainage ditch can be dug further from the filled areas, and the
seeps ~~are~~ present there can be more adequately covered.
